

83% of organizations believe a QMS solution helped with product recall recovery<sup>1</sup>

Business process standardization reduces process costs by 15% and errors by 30%.<sup>2</sup>

Audit ready for standards like AS9100D, ISO 9001, DFARS, DCAA and CMMC.<sup>3</sup>

## Deploy Costpoint with TIPQA for Better-Quality Products and Real-Time Visibility

For today's government contracting (GovCon) leaders, the right technology partner makes all the difference when it comes to gaining real-time visibility and meeting quality assurance (QA) standards. PDS Consulting helps companies obtain reliable QA by implementing industry-leading solutions such as Deltek Costpoint with TIPQA, a quality management system (QMS) with an integrated, secure and scalable approach that takes business intelligence to new heights. With flexible on-prem or hosted deployments, PDS clients can quickly improve supplier quality, cost control, and compliance for greater market share and customer satisfaction.

**Here's how PDS can help you deploy Costpoint Manufacturing with TIPQA for a comprehensive view of your organization:**

### The Power of Integrated Quality Management Systems with ERP

1

In the highly competitive landscape of aerospace and defense manufacturing, maintaining the highest standards of quality and efficiency is paramount. Meeting industry-specific requirements while striving for operational excellence is not just a goal but a necessity. To soar above the competition and increase revenue, it's time to integrate a robust Quality Management System (QMS) with your Enterprise Resource Planning (ERP) solution.

## Here's how PDS can help you deploy Costpoint Manufacturing with TIPQA for a comprehensive view of your organization:

### Elevating Standards, Safeguarding Compliance

2

In the aerospace and defense sectors, quality is non-negotiable. The adherence to stringent industry standards, such as AS9100 and ITAR, is not only expected but legally required. A comprehensive QMS integrated with your ERP ensures that your manufacturing processes are consistently aligned with these standards. This integration streamlines compliance monitoring and reporting, reducing the risk of costly errors and regulatory violations.

### Efficiency Unleashed: The Power of Integration

3

Imagine a manufacturing environment where data flows seamlessly between departments. An integrated QMS and ERP system eliminates data silos, enabling real-time visibility into your operations. From design to production, quality control to supply chain management, every aspect of your business becomes interconnected. This increased visibility empowers decision-makers to identify bottlenecks, optimize workflows, and enhance productivity.

### The Cost-Effective Solution

4

Aerospace and defense manufacturing often involve intricate processes, where even the slightest deviation can lead to substantial costs. Integrated QMS and ERP systems help you identify issues in real-time, reducing the likelihood of costly defects and rework. This proactive approach not only saves money but also preserves your reputation for delivering on-time and within budget.

### Enhancing Traceability and Accountability

5

In these industries, traceability is paramount. With an integrated QMS and ERP, you can track the journey of every component and assembly, ensuring complete transparency and accountability. Whether it's a supplier's certificate of compliance or a part's inspection history, the information is at your fingertips, reducing the risk of errors and the need for manual record-keeping.

### Boosting Revenue: The Ultimate Goal

6

While quality and compliance are non-negotiable, revenue growth is equally vital. An integrated QMS and ERP system optimizes your operations, reducing costs, shortening lead times, and enhancing customer satisfaction. Satisfied customers lead to repeat business and referrals, driving revenue growth. Moreover, by demonstrating your commitment to quality and efficiency, you become a preferred supplier in the industry, opening doors to new contracts and partnerships.

### Invest in Your Future Today

7

In the aerospace and defense manufacturing sector, the margin for error is razor-thin. To not only survive but thrive, you need to invest in the right tools. An integrated Quality Management System with your ERP isn't just a choice; it's an imperative. It safeguards compliance, optimizes efficiency, reduces costs, and ultimately increases your revenue. Are you ready to take your aerospace and defense manufacturing to new heights? Contact us today to learn how our integrated QMS and ERP solutions can transform your business and drive success in this dynamic industry. Your future begins now.
